

# modern CASTING

1972

## Editorial Index

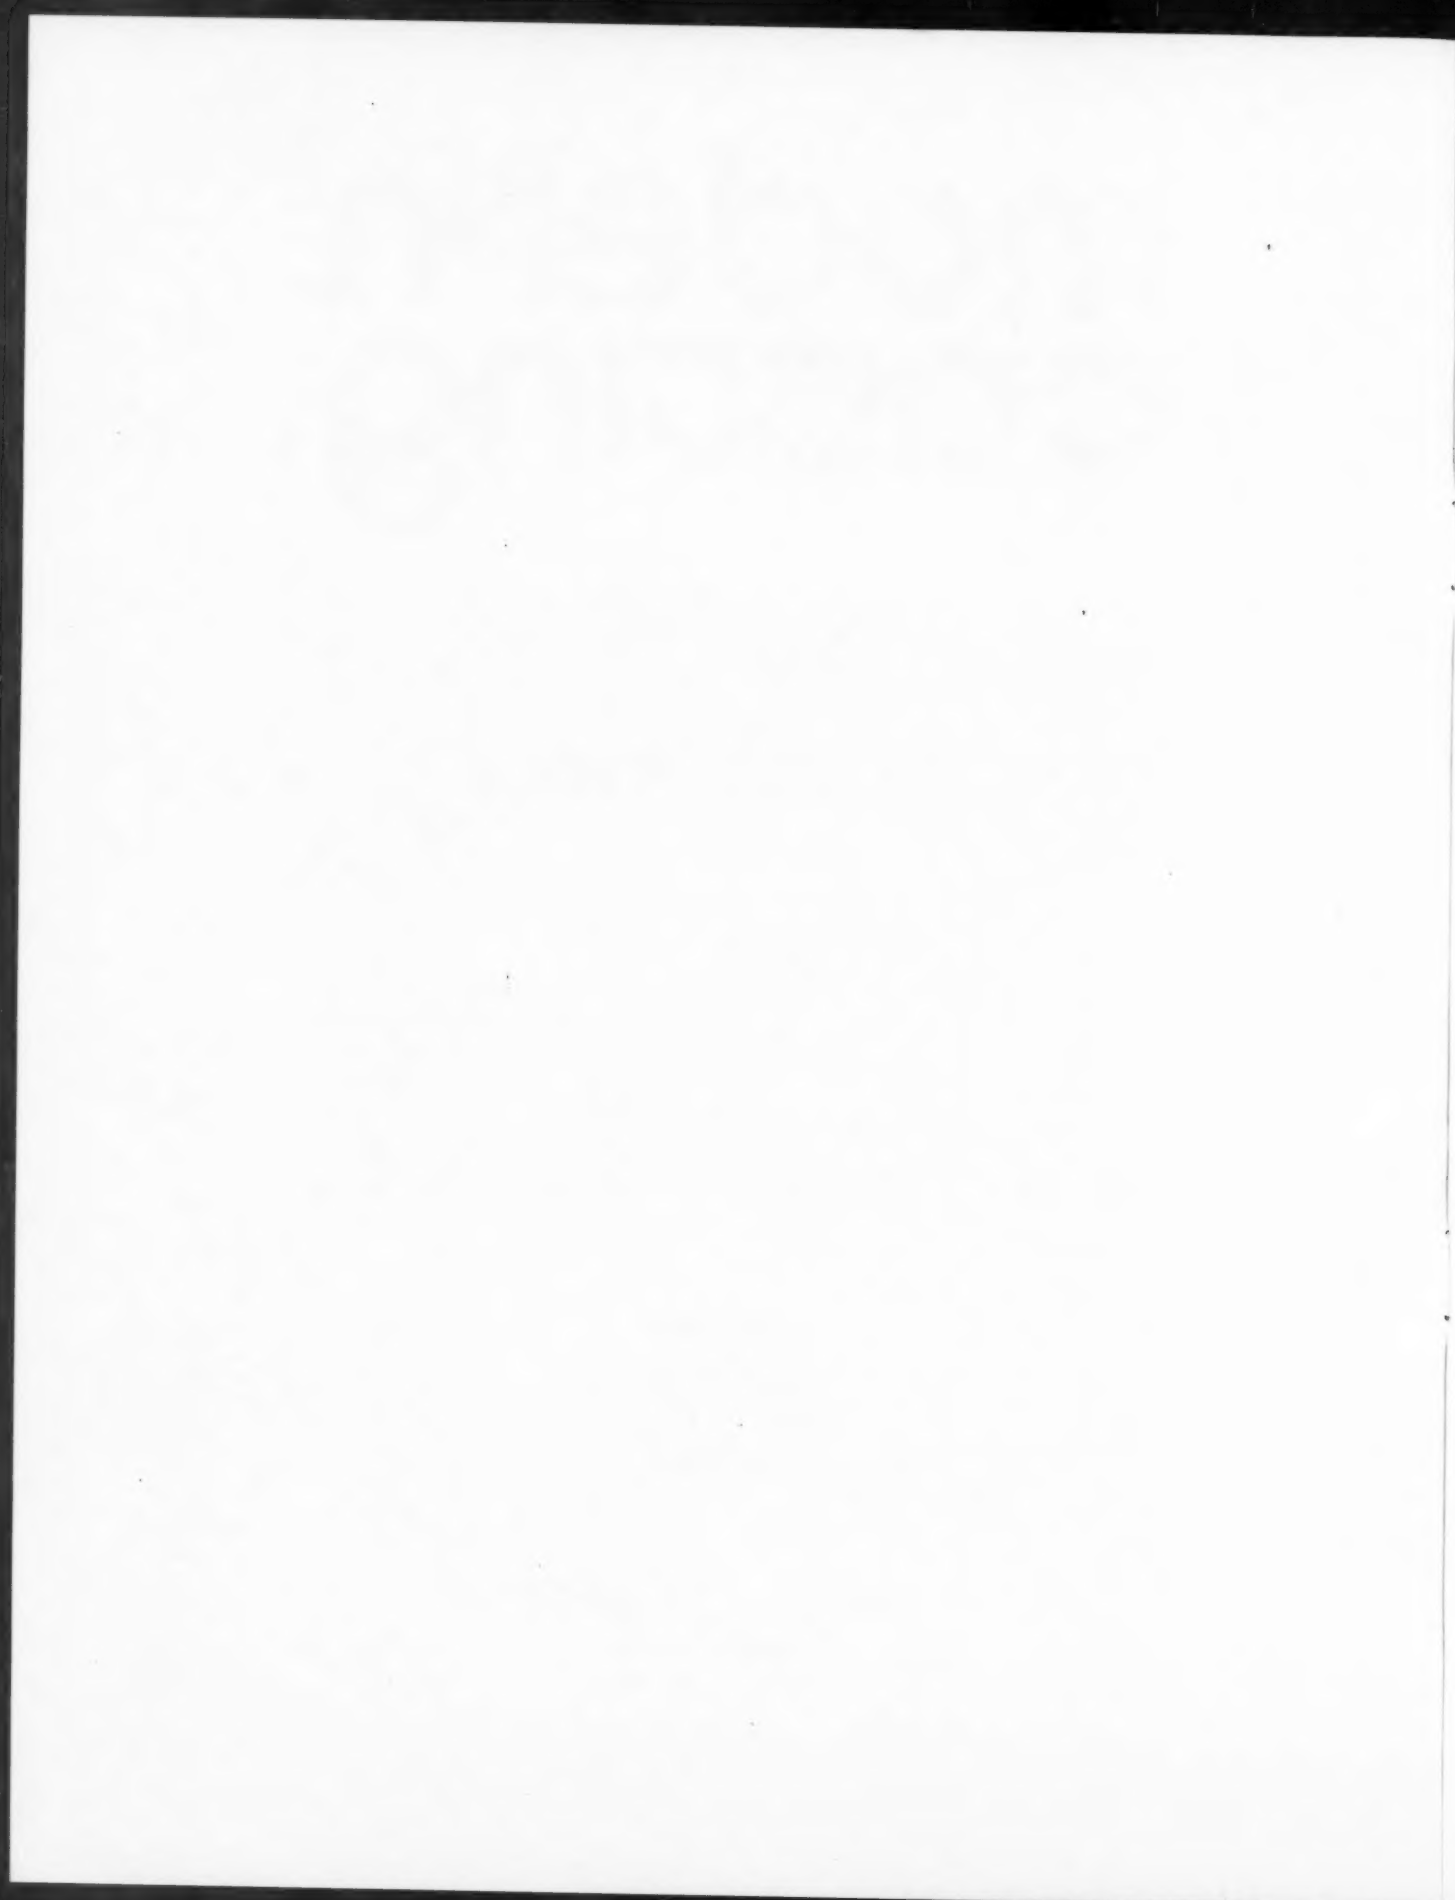

January-December, 1972

Volumes 51-52

*New Technology—Market Opportunities—Management in Action—Technology for Progress—Operations for Profit—Plant Tours—International Technology. In 1972 over 120 individual authors communicated their know-how to the metalcasting industry in more than 332 pages of MODERN CASTING feature articles.*

Published by American Foundrymen's Society  
Golf and Wolf Roads  
Des Plaines, Ill. 60016

## Jan.-Dec. 1972 Volumes 61-62

### A

#### AIR POLLUTION CONTROL

- Cupola Emission Control at Auto Specialties Manufacturing Co. - A. J. Wagner, July, p 38-40.
- Inventory of Iron Foundry Emissions - B. S. Gutow, Jan, p 46-48.
- Low-Emission Inoculant Gives Closer Control & Operating Advantages, Nov, p 192.
- Monitoring Operation of a Multiple-Collector Pollution Control Installation - A. J. Wagner, Aug, p 36-37.
- Pollution Control and Public Relations - A. J. Wagner, Dec, p 29.
- Shepard Niles Installs Air Pol's Air Sweep at Chemung Foundry, Jan, p 64.
- Superior Steel's New Makeup Air System - M. P. O'Laughlin, Sept, p 46-47.

#### ALUMINUM

- Automated System Increases Production, Dec, p 38.

#### AMERICAN FOUNDRYMEN'S SOCIETY

- Chapter Officer Conference Concentrates On Achieving More Effective Operations, Aug, p 48.
- People are Key to ACIPCO's Success, May, p 54.

#### AFS CASTING CONGRESS

- Combined AFS-IFC Activities Attract World-Wide Interest, Participation, June, p 58-66.
- Gallery of Awards, April, p 92-93.
- 76th AFS Casting Congress Official Program, April, p 84-89.
- 76th AFS Congress & Exposition Highlights, April, p 83.
- Technology for Progress, April, p 94-98.

#### AFS EXPOSITION

- Casting Congress Exhibitors, April, p 99-101.

#### AFS EXPOSITION (Cont'd)

- Exposition Features Improved Products, June p 76-87.

#### AFS REGIONALS

- AFS Michigan Regional Presents a View of the Future, Dec, p 44.
- AFS Pennsylvania State Foundry Conference Gives Broad Look Into Present, Future - Dec, p 43.
- Awareness Looms as Key Word at 21st AFS Northwestern Conference - R. Ledgerwood, May, p 59.
- New England Regional Reflects Business-Economic Recovery - G. X. Diamond, Jan, p 55.
- Southeastern Regional Conference Held in Atlanta, Feb. 24-25, May, p 56.
- Texas Regional Foundry Conference Features Improved Productivity - Profitability Theme, May, p 61.
- Top Quality Talks at AFS Midwest Regional, Feb, p 56.
- Wisconsin Regional Emphasizes Environmental Control Subjects, April, p 114-116.

#### AUTOMOTIVE

- Now Casting Blocks at Ford's Michigan Casting Center--Progress Report III - J. H. Schaum, March, p 38-46.

### B

#### BUYERS DIRECTORY

- Directolog 1973, Nov, p BD1-BD120.

#### BUYING

- Directolog 1973, Nov, p BD1-BD120.
- Directory of Sand Additive Trade Names, Nov, p 177-178.
- How Foundries Buy - A MODERN CASTING Staff Survey Report, Nov, p 46-50.

### C

#### CASTING

- Record Breaking Yankee Dryer - J. H. Schaum, Feb, p 50.

#### CASTING DEFECTS

- Neutron Radiography--A Quality Assurance Tool for the Foundryman - F. J. Lamphere, Oct, p 50-52.
- A Statistical Solution to Pinholes - S. A. Davis, F. A. Wile, Dec, p 30-31.
- Veining . . . Swells, Oct, p 58.

#### CASTINGS

- Add Value by Upgrading Castings - W. R. Brandt, K. A. Ristau, Feb, p 36-39.

#### CENTRIFUGAL CASTING

- Pont-A-Mousson . . . Pride of France - J. H. Schaum, Dec, p 26-28.

#### CHEMICAL SETTING SAND

- Continuous Mixer with Revolutionary New Spinning Disc Principle, June, p 107-108.
- How Delray Foundry Recirculates No-Bakes - G. X. Diamond, July, p 34-35.
- New No-Bake Sand Reclaimer at Rodney Hunt Co. - T. Harty, Feb, p 48-49.
- New Steel Plant Is 100% No-Bake - A. J. Wagner, Feb, p 40-42.
- Reclamation of No-Bake Sands - Frank Dettore, John Parish, April, p 102-104.

#### CLEANING & FINISHING

- Abrasives in the Cleaning Room: A Means to Generate Profit--Part I - J. A. Mueller, April, p 60-62.
- Abrasives in the Cleaning Room: A Means to Generate Profit--Part II - J. A. Mueller, June, p 33-34.
- Abrasives in the Cleaning Room: A Means to Generate Profit--Part III - J. A. Mueller, July, p 22-23.
- Abrasives in the Cleaning Room: A Means to Generate Profit--Part IV - J. A. Mueller, Aug, p 38-39.
- Abrasives in the Cleaning Room: A Means to Generate Profits--Conclusion - J. A. Mueller, Sept, p 55-57.
- Automatic Snag Grinding at Auto Specialties - A. J. Wagner, Sept, p 40-41.
- Can a 103-Year Old Steel Foundry Go Modern? - Donald Clem, Sept, p 52-53.
- Electromagnetic Eddy Current Testing Gives Shotblast Machine Parts Longer Life - David Hale, Jan, p 32.
- Get More Productivity by Improving Those Air Chisel/Air Grinding Work Stations, Feb, p 30-31.
- Modern Finishing Room Technology & Environment - R. C. Robinson, Oct, p 61.
- New No-Bake Sand Reclaimer at Rodney Hunt Co. - T. Harty, Feb, p 48-49.
- Tests Document Economies of High Speed Grinding - J. J. Boggs, March, p 28-30.
- What Equipment Do I Need to Clean Castings? - T. J. Campbell, Oct, p 44-46.

#### CO<sub>2</sub> PROCESS

- Can A 103-Year Old Steel Foundry Go Modern? - Donald Clem, Sept, p 52-53.

## COLD BOX PROCESS

Cold Box Coremaking at Auto Specialties - A. J. Wagner, Aug, p 24-26.

## COMPUTERS

Small Computer Pays Its Way - A. J. Wagner, Dec, p 35-37.

## COPPER BASE ALLOYS

Navy's Newest Sea-Going Foundry - A. J. Wagner, Aug, p 40-42.

## CORES & COREMAKING

Can A 103-Year Old Steel Foundry Go Modern? - Donald Clem, Sept, p 52-53.

Cold Box Coremaking at Auto Specialties - A. J. Wagner, Aug, p 24-26.

How To . . . Vastly Improve As-Cast Finish and Reduce Clean-Up Costs, April, p 55.

Saga of Success--Part II, Continuing Modernization - J. H. Schaum, Oct, p 42-43.

## COVER STORIES

General Motors Designs Advanced Concepts into Defiance Casting Plant - J. H. Schaum, A. J. Wagner, Jan, p 33-40.

How Casting Blocks at Ford's Michigan Casting Center--Progress Report III - J. H. Schaum, March, p 38-46.

Pont-A-Mousson . . . Pride of France - J. H. Schaum, Dec, p 26-28.

Pressure Pouring Channel Furnaces - K. G. Soderlund, Aug, p 27.

Record Breaking Yankee Dryer - J. H. Schaum, Feb, p 50.

Rockwell Heat Treats Valve Bodies - Sept, p 54.

Swiss Metalcaster Competes by Specializing - J. H. Schaum, July, p 28-30.

Valley Mould: New Ingot Mould Casting Facility - Morris Horwitz, Oct, p 48-49.

## CUPOLA

Cupola Emission Control at Auto Specialties Manufacturing Co. - A. J. Wagner, July, p 38-40.

Low-Pollution, Gas-Fired Cupola Completes Pilot Run Tests - J. A. Davis, G. P. Dahm, D. E. Price, Sept, p 48-50.

Monitoring Operation of a Multiple-Collector Pollution Control Installation - A. J. Wagner, Aug, p 36-37.

Pollution Control and Public Relations - A. J. Wagner, Dec, p 29.

Shepard Niles Installs Air Pol's Air Sweep at Chemung Foundry, Jan, p 64.

## CURING CASTING DEFECTS

Cold Shots . . . Mold Shifts, Sept, p 51.

Drops . . . Misruns, Dec, p 34.

## CURING CASTING DEFECTS (Cont'd)

Veining . . . Swells, Oct, p 58.

## D

### DUCTILE (MODULAR) IRON

General Motors Designs Advanced Concepts into Defiance Casting Plant - J. H. Schaum, A. J. Wagner, Jan, p 33-40.

Low-Emission Inoculant Gives Closer Control & Operating Advantages, Nov, p 192.

Making Quality Ductile Iron at Griffin Pipe Products Co., Aug, p 52-53.

New Method of Treatment with Pure Magnesium to Produce Nodular Iron - A. Alt, K. Gut, H. Lustenberger, H. G. Trapp, June, p 56-57.

Pont-A-Mousson . . . Pride of France - J. H. Schaum, Dec, p 26-28.

Porter Foundry Automates - Ned Carick, Aug, p 31.

## E

### EDUCATION & TRAINING

AFS-T&RI In-Plant Measurements Course Provides OSHA Insights - John Shockley, May, p 46.

OSHA Training Center Developing Program Enforcement Officers, June, p 55.

### ENVIRONMENTAL CONTROL

Inventory of Iron Foundry Emissions - B. S. Gutow, Jan, p 46-48.

Monitoring Operation of a Multiple-Collector Pollution Control Installation - A. J. Wagner, Aug, p 36-37.

75 Years of Progress in Foundry Ecology - H. J. Weber, May, p 41-44.

Superior Steel's New Makeup Air System - M. P. O'Laughlin, Sept, p 46-47.

## F

### FROM THE EDITOR

Alerting Washington . . . March, p 37.

Another Case of Future Shock, May, p 33.

Engineering Technologists . . . A New Breed of Employee, Aug, p 23.

Exporting Know-How, July, p 27.

In Memory . . . of an Editor, Dec, p 23.

New Technology . . . the Waste Maker, June, p 51.

On the Way to 1990 . . . April, p 81.

Only Direction . . . Up, Jan, p 32C.

A Protest Song . . . Nov, p 45.

Techno-71 . . . A Technical Awareness Imperative, Feb, p 35.

A War by Any Other Name, Sept, p 39.

Waste Management . . . Our Recycling Imperative, Oct, p 41.

## FURNACES

Inventory of Iron Foundry Emissions - B. S. Gutow, Jan, p 46-48.

Oil Fired Reverb Melts Gray Iron - J. H. Schaum, Oct, p 54-55.

Porter Foundry Automates - Ned Carrick, Aug, p 31.

## G

### GATING

How To . . . Gate a Casting - I, Sept, p 58.

How To . . . Gate a Casting - II, Oct, p 53.

### GRAY IRON

Automatic Sand System . . . A Moving Story - G. B. Bergman, Oct, p 59.

Here's How To . . . Do a Better Job of Pouring - Frances LeBaron, Aug, p 35.

Navy's Newest Sea-Going Foundry - A. J. Wagner, Aug, p 40-42.

New Ferrous Casting Facility at General Electric's Appliance Park, Louisville - A. J. Wagner, Aug, p 28-30.

Now Casting Blocks at Ford's Michigan Casting Center--Progress Report III - J. H. Schaum, March, p 38-46.

Oil Fired Reverb Melts Gray Iron - J. H. Schaum, Oct, p 54-55.

Record Breaking Yankee Dryer - J. H. Schaum, Feb, p 50.

Valley Mould: New Ingot Mould Casting Facility - Morris Horwitz, Oct, p 48-49.

## H

### HEAT TREATING

Rockwell Heat Treats Valve Bodies, Sept, p 54.

### HIGH ALLOY CASTINGS

Swiss Metalcaster Competes by Specializing - J. H. Schaum, July, p 28-30.

### HOW TO

How To . . . Fast Pattern Changeover at E. L. LeBaron Foundry - Frances LeBaron, Jr., June, p 37.

How To . . . Gate a Casting - I, Sept, p 58.

How To . . . Gate a Casting - II, Oct, p 53.

How To . . . Get Full Machine Utilization from that Automatic Molding Machine, July, p 21.

How To . . . Vastly Improve As-Cast Finish and Reduce Clean-Up Costs, April, p 55.

# I

## INDUSTRIAL ENGINEERING

Abrasives in the Cleaning Room:  
A Means to Generate Profit--  
Conclusion - J. A. Mueller, Sept,  
p 55-57.

## INOCULATION

Low-Emission Inoculant Gives Closer  
Control & Operating Advantages,  
Nov, p 192.

## INTERNATIONAL FOUNDRY CONGRESSES

International Foundry Congress  
Features Talks, Social Events,  
April, p 90.

39th World Foundry Congress in  
U.S.A. - J. H. Schaum, June,  
p 67-70.

# K

## KEEP IT CLEAN

An Approach to Foundry Waste Water  
Treatment - William M. Throop,  
Oct, p 62.  
Pollution Control and Public  
Relations - A. J. Wagner, Dec, p 29.

## KEEP IT SAFE

Analyzing Workmen's Compensation  
Losses & Setting Priorities to Cut  
Them - Gordon B. Lemke, Sept, p 62.

# L

## LADLES & CRUCIBLES

New Method of Treatment with Pure  
Magnesium to Produce Modular Iron -  
A. Alt, K. Gut, H. Lustenberger,  
H. G. Trapp, June, p 56-57.

# M

## MAINTENANCE

Successful Maintenance Programs--How  
the Plant Engineer Makes it  
Happen - C. E. Fausel, June p 52-54.  
When Do You Need A Heavy-Duty Lift  
Truck Radiator? - D. W. Erskine,  
Leon Bergonia, Sept, p 59.

## MALLEABLE IRON

Cupola Emission Control at Auto  
Specialties Manufacturing Co. -  
A. J. Wagner, July, p 38-40.

## MANAGEMENT

Add Value by Upgrading Castings -  
W. R. Brandt, K. A. Ristau, Feb,  
p 36-39.  
Can A 103-Year Old Steel Foundry Go  
Modern? - Donald Clem, Sept, p 52-53.  
Directology 1973, Nov, p BD1-BD120.  
Directory of Sand Additive Trade  
Names, Nov, p 177-178.  
General Motors Designs Advanced  
Concepts into Defiance Casting  
Plant - J. H. Schaum, A. J. Wagner,  
Jan, p 33-40.  
How Foundries Buy - A MODERN CASTING  
Staff Survey Report, Nov, p 46-50.  
Inventory of Iron Foundry Emissions -  
B. S. Gutow, Jan, p 46-48.  
Iron Flow in the United States, Oct,  
p 56-57.  
ISHC of the Metalcasting Industry,  
May, p 40-41.  
MODERN CASTING's Trends Panel Looks at  
Business Trends, In-Plant  
Environment & Phase II -  
A. J. Wagner, Jan, p 41-43.  
New Steel Plant is 100% No-Bake -  
A. J. Wagner, Feb, p 40-42.  
Now Casting Blocks at Ford's Michigan  
Casting Center--Progress Report  
III - J. H. Schaum, March, p 38-46.  
Pollution Control and Public  
Relations - A. J. Wagner, Dec, p 29.  
Profile of Metalcasting in America,  
March, p 50-53.  
Saga of Success--Part I, Lessons in  
Management - J. H. Schaum, Sept,  
p 44-45.  
Saga of Success--Part II, Continuing  
Modernization - J. H. Schaum, Oct,  
p 42-43.  
Sixth Census of World Casting  
Production, Dec, p 24-25.  
75 Years of Progress in Foundry  
Ecology - H. J. Weber, May, p 41-44.  
Small Computer Pays its Way - A. J.  
Wagner, Dec, p 35-37.  
Successful Maintenance Programs--How  
the Plant Engineer Makes it Happen -  
C. E. Fausel, June, p 52-54.  
Techno - '71 (Part 2), Feb, p 51-53.  
Techno - '71 (Part 3), March, p 54-56.  
Thank You - L. F. Gleason, May, p 38-39.  
Trends Panel Tells of Metalcaster-  
Vendor Activity on Safety, Hygiene  
& In-Plant Environment - A. J.  
Wagner, May p 34-36.  
What Equipment Do I Need to Clean  
Castings? - T. J. Campbell, Oct,  
p 44-46.  
Wisconsin Foundrymen Meet with Their  
Congressmen - J. H. Schaum, May, p 37.

## MARKETING

Add Value by Upgrading Castings -  
W. R. Brandt, K. A. Ristau, Feb,  
p 36-39.  
Directory of Sand Additive Trade  
Names, Nov, p 177-178.  
How Foundries Buy - A MODERN CASTING  
Staff Survey Report, Nov, p 46-50.  
MODERN CASTING's Trends Panel Looks  
at Business Trends, In-Plant  
Environment & Phase II - A. J.  
Wagner, Jan, p 41-43.  
Profile of Metalcasting in America,  
March, p 50-53.

## MATERIALS HANDLING

Automating Unit 266 at Brillion Iron  
Works - A. J. Wagner, March, p 47-49.

## MATERIALS HANDLING (Cont'd)

Buying the Right Overhead Lifting  
Device, Oct, p 47.  
General Motors Designs Advanced  
Concepts into Defiance Casting  
Plant - J. H. Schaum, A. J. Wagner,  
Jan, p 33-40.  
Saga of Success--Part II, Continuing  
Modernization - J. H. Schaum,  
Oct, p 42-43.  
Valley Mould: New Ingot Mould Casting  
Facility - Morris Horwitz, Oct,  
p 48-49.  
What Equipment Do I Need to Clean  
Castings? - T. J. Campbell,  
Oct, p 44-46.  
When Do You Need A Heavy-Duty Lift  
Truck Radiator? - D. W. Erskine,  
Leon Bergonia, Sept, p 59.

## MATERIALS-ON-THE-MOVE

Ten Commandments of Cranes and  
Hoists - R. G. Hogentogler, May,  
p 24B-24C.

## MECHANIZATION & AUTOMATION

Automated System Increases Production,  
Dec, p 38.  
Automatic Pouring at Crane Company's  
Chattanooga Plant, July, p 51-52.  
Automatic Sand System . . . A Moving  
Story - G. B. Bergman, Oct, p 59.  
Automatic Snag Grinding at Auto  
Specialties - A. J. Wagner, Sept,  
p 40-41.  
Automating Unit 266 at Brillion Iron  
Works - A. J. Wagner, March,  
p 47-49.  
Buying the Right Overhead Lifting  
Device - Oct, p 47.  
General Motors Designs Advanced  
Concepts into Defiance Casting  
Plant - J. H. Schaum, A. J. Wagner,  
Jan, p 33-40.  
High Production Molding Through  
Automation - J. R. Bates, Aug,  
p 32-34.  
How To . . . Get Full Machine  
Utilization from that Automatic  
Molding Machine, July, p 21.  
New Ferrous Casting Facility at  
General Electric's Appliance Park,  
Louisville - A. J. Wagner, Aug,  
p 28-30.  
New No-Bake Sand Reclaimer at Rodney  
Hunt Co. - T. Harty, Feb, p 48-49.  
Now Casting Blocks at Ford's Michigan  
Casting Center--Progress Report  
III - J. H. Schaum, March p 38-46.  
Pont-A-Mousson . . . Pride of France -  
J. H. Schaum, Dec, p 26-28.  
Porter Foundry Automates - Ned  
Carrick, Aug, p 31.  
Pressure Pouring Channel Furnaces -  
K. G. Soderlund, Aug, p 27.  
Saga of Success--Part I, Lessons in  
Management - J. H. Schaum, Sept,  
p 44-45.  
Swiss Metalcaster Competes by  
Specializing - J. H. Schaum, July,  
p 28-30.  
What Equipment Do I Need to Clean  
Castings? - T. J. Campbell, Oct,  
p 44-46.

## MELTING PRACTICES

- Fumeless Decarburization for Steel Melting, Dec, p 52.
- Low-Pollution, Gas-Fired Cupola Completes Pilot Run Tests - J. A. Davis, G. P. Dahm, D. E. Price, Sept, p 48-50.
- New Method of Treatment with Pure Magnesium to Produce Nodular Iron - A. Alt, K. Gut, H. Lustenberger, H. G. Trapp, June, p 56-57.
- Oil Fired Reverb Melts Gray Iron - J. H. Schaum, Oct, p 54-55.
- Pont-A-Mousson . . . Pride of France - J. H. Schaum, Dec, p 26-28.
- Taking the Fireworks Out of Inoculations, May, p 69-70.

## METALLURGY

- Low-Emission Inoculant Gives Closer Control & Operating Advantages, Nov, p 192.
- Low-Pollution, Gas-Fired Cupola Completes Pilot Run Tests - J. A. Davis, G. P. Dahm, D. E. Price, Sept, p 48-50.
- Making Quality Ductile Iron at Griffin Pipe Products Co., Aug, p 52-53.
- New Method of Treatment with Pure Magnesium to Produce Nodular Iron - A. Alt, K. Gut, H. Lustenberger, H. G. Trapp, June, p 56-57.
- A Statistical Solution to Pinholes - S. A. Davis, F. A. Wile, Dec, p 30-31.
- Taking the Fireworks Out of Inoculation, May, p 69-70.

## MOLD MATERIALS

- Biasill Staurolite Sand - New Tool for Better Castings and Cost Reduction, Feb, p 64-65.

## MOLDING

- Automatic Sand System . . . A Moving Story - G. B. Bergman, Oct, p 59.
- Automating Unit 266 at Brillion Iron Works - A. J. Wagner, March, p 47-49.
- High Production Molding Through Automation - J. R. Bates, Aug, p 32-34.
- How Delray Foundry Recirculates No-Bakes - G. X. Diamond, July, p 34-35.
- How To . . . Get Full Machine Utilization from that Automatic Molding Machine, July, p 21.
- How To . . . Vastly Improve As-Cast Finish and Reduce Clean-Up Costs, April, p 55.
- New B & P Roto-Matchblomatic Molding Machine Sets Higher Production Standards for Matchplate Molding, April, p 131-132.
- New Weight & Jacket Setter is Simple and Near Fool-Proof - Oct, p 75.
- Swiss Metalcaster Competes by Specializing - J. H. Schaum, July, p 28-30.

## MOLDS

- Valley Mould: New Ingot Mould Casting Facility - Morris Horwitz, Oct, p 48-49.

## MORE ABOUT ENVIRONMENT

- Reinvention of the Environmental Wheel - W. B. Huelsen, May, p 29.

## MORE ABOUT NOISE

- Huh? - John Shockley, Jan, p 50.

## N

### NONDESTRUCTIVE TESTING

- Add Value by Upgrading Castings - W. R. Brandt, K. A. Ristau, Feb, p 36-39.
- Magnetic Particle Inspection of Large Castings - M. O. Daley, D. Struk, Sept, p 42-43.
- Neutron Radiography--A Quality Assurance Tool for the Foundryman - F. J. Lamphere, Oct, p 50-52.
- Radiography Laboratory Strives To Do NDT Effectively with Greater Reliability - C. L. Sober, July, p 31-33.
- 75 Years Progress . . . in Quality Control & Inspection - P. J. Mikelonis, Feb, p 43-47.

## P

### PERMANENT MOLD CASTING

- Automated System Increases Production, Dec, p 38.

### PLANT DESCRIPTION

- General Motors Designs Advanced Concepts into Defiance Casting Plant - J. H. Schaum, A. J. Wagner, Jan, p 33-40.
- Navy's Newest Sea-Going Foundry - A. J. Wagner, Aug, p 40-42.
- New Ferrous Casting Facility at General Electric's Appliance Park, Louisville - A. J. Wagner, Aug, p 28-30.
- New Steel Plant is 100% No-Bake - A. J. Wagner, Feb, p 40-42.
- Now Casting Blocks at Ford's Michigan Casting Center--Progress Report III - J. H. Schaum, March, p 38-46.
- Pont-A-Mousson . . . Pride of France - J. H. Schaum, Dec, p 26-28.
- Swiss Metalcaster Competes by Specializing - J. H. Schaum, July, p 28-30.
- Valley Mould: New Ingot Mould Casting Facility - Morris Horwitz, Oct, p 48-49.

## POURING

- Automatic Pouring at Crane Company's Chattanooga Plant, July, p 51-52.

## POURING (Cont'd)

- How To . . . Do a Better Job of Pouring - Frances LeBaron, Aug, p 35.
- Pressure Pouring Channel Furnaces - K. G. Soderlund, Aug, p 27.

## PRODUCT OF THE MONTH

- Automatic Pouring at Crane Company's Chattanooga Plant, July p 51-52.
- Biasill Staurolite Sand - New Tool for Better Castings and Cost Reduction, Feb, p 64-65.
- Continuous Mixer with Revolutionary New Spinning Disc Principle, June, p 107-108.
- Fumeless Decarburization for Steel Melting, Dec, p 52.
- Low-Emission Inoculant Gives Closer Control & Operating Advantages, Nov, p 192.
- Making Quality Ductile Iron at Griffin Pipe Products Co., Aug, p 52-53.
- New B & P Roto-Matchblomatic Molding Machine Sets Higher Production Standards for Matchplate Molding, April, p 131-132.
- New Weight & Jacket Setter is Simple and Near Fool-Proof - Oct, p 75.
- Precision Green Sand Molding with DIKO, April, p 134.
- Shepard Niles Installs Air Pol's Air Sweep at Chemung Foundry, Jan, p 64.
- Taking the Fireworks Out of Inoculation, May, p 69-70.
- ZRBSC-High Temperature Helpers for Metalcasters, Sept, p 71-72.

## Q

### QUALITY CONTROL

- Add Value by Upgrading Castings - W. R. Brandt, K. A. Ristau, Feb, p 36-39.
- Neutron Radiography--A Quality Assurance Tool for the Foundryman - F. J. Lamphere, Oct, p 50-52.
- Radiography Laboratory Strives To Do NDT Effectively with Greater Reliability - C. L. Sober, July, p 31-33.
- Radiography . . . Major Contribution to the Metalcasting Industry - R. E. Turner, Jan, p 44-45.
- 75 Years Progress . . . in Quality Control & Inspection - P. J. Mikelonis, Feb, p 43-47.
- A Statistical Solution to Pinholes - S. A. Davis, F. A. Wile, Dec, p 30-31.
- Vetning . . . Swells - Oct, p 58.

## R

### RADIOGRAPHS & RADIOGRAPHY

- Add Value by Upgrading Castings - W. R. Brandt, K. A. Ristau, Feb, p 36-39.
- Neutron Radiography--A Quality Assurance Tool for the Foundryman - F. J. Lamphere, Oct, p 50-52.

## RADIOGRAPHS & RADIOGRAPHY (Cont'd)

- Radiography Laboratory Strives To Do NDT Effectively with Greater Reliability - C. L. Sober, July, p 31-33.  
Radiography . . . Major Contribution to the Metalcasting Industry - R. E. Turner, Jan, p 44-45.  
75 Years Progress . . . in Quality Control & Inspection - P. J. Mikelonis, Feb, p 43-47.

## REFRACTORIES

- ZRBSC-High Temperature Helpers for Metalcasters, Sept, p 71-72.

## S

### SAFETY & HEALTH

- AFS-T&RI In-Plant Measurements Course Provides OSHA Insights - John Shockley, May, p 46.  
ISHC of the Metalcasting Industry, May, p 40-41.

## ENVIRONMENTAL CONTROL BOOK

After two years of work by dedicated foundrymen, and vendors to the foundry industry, the American Foundrymen's Society proudly announces the first of a two-volume set of books dealing with the area of environmental control. The first volume covers the area of in-plant environmental control. These books are designed to guide and assist the average foundry owner in not only complying with existing laws but also in making his foundry a truly pleasant place in which to work.

With the passage and now enforcement of the Occupational Safety and Health Act of 1970 (OSHA), this series of booklets becomes must reading for all concerned foundrymen. These booklets are placed in a looseleaf binder and contain 360 pages, with appropriate illustrations, of information which will prove helpful to foundries to comply with this new Act.

There are 12 Booklets contained in this looseleaf. The following are samples of the titles of the booklets and the material they contain:

The Visual Environment—Light and color is a first of its kind and bears the approval of General Electric and PPG Industries.

The areas of radiant heat, air temperature, humidity and human comfort are discussed in Heat Stress and Non-ionizing Radiation.

General Principles of Foundry Ventilation will help you make the foundry a better place to work by discussing principles of air flow, makeup air, recirculation, etc.

Exhaust hoods, exhaust systems, pipe design, the nomograph in pipe design, system designing by the standard friction method will be covered in the booklet, Exhaust Systems and Hood Design.

Other booklet titles are: Design of Sand-Handling Systems; Molding, Coremaking and Patternmaking; Melting and Pouring; Cleaning Room; Maintenance; Fans and Testing Ventilation Systems; Industrial Hygiene; Ionizing Radiations; and Control of Noise.

Several of these Booklets are entirely new and cover areas found in OSHA. Authors of all of these booklets are considered experts in their respective fields. It is our opinion that this entire 1st Volume of booklets is a much needed addition to any foundryman's technical library and will prove to be a great asset to his operations as a whole.

## HISTORY OF THE METALCASTING INDUSTRY

A classic book, the work of Bruce L. Simpson, brings together under one cover the history of the metalcasting industry from the year 6000 B.C. to today.

This book is a collector's item in that only 2,000 copies were printed and at this time, it is undetermined when the next edition will become available. Not only is this book a collector's item but its "high class" makes it an attractive item to be placed in your reception area, library or as a gift to your customers. The book contains 276 oversize pages, 207 meaningful illustrations and beautifully set type printed with all the clarity of first class letterpress on finest coated paper. The cover is gold-embossed linen finish, case bound, permanent hard cover format.

If you're involved with metalcasting, you're involved with something that is basic to the stature of modern industry. This book proves it! History of the Metalcasting Industry is about you and the long illustrious history that supports your work today. It is so authoritative, it is used as a metalcasting history source book by the Encyclopedia Britannica.

## PROGRAMMED LEARNING

In keeping with one of its objectives, the AFS offers to the metalcasting industry publications which can be used to educate and update its personnel. The AFS-T&RI has developed a series of programmed learning courses covering the industry in general, gating and risering and ferrous metallurgy. These courses have been well received by metalcasters and are being used in many foundries continuing educational programs.

Cast Metals Technology Series includes the following courses:

*Basic Principles of Gating* is a programmed learning course intended to teach those starting a career in the foundry how to design a gating system and how it can control the flow of molten metal for improved casting quality. Personnel at all levels will find the text useful since scientific principles are compared to and described in terms of everyday, on-the-job experiences. The material is presented in 78 pages, 275 frames, with 163 illustrations.

**Circle No. TE 670 on order blank**

**Price \$6.00**

The second course in the series is *Basic Principles of Riser*. This text has 64 pages, 329 frames and 106 illustrations and covers what happens to the molten metal after it leaves the gates and enters and fills the mold cavity. The fundamentals presented in this course are based on research projects conducted by AFS and individual companies. It is hoped and expected that after the student has completed this course he will have a better understanding of risers and may be able to use them to their fullest capabilities.

**Circle No. TE 680 on order blank**

**Price \$6.00**

*Principles of Physical Metallurgy for Ferrous Castings*, Vol. 1, has been written by Clyde B. Jenni, retired Chief Metallurgist, General Steel Industries. This course is designed to give a more thorough knowledge of the principles of physical ferrous metallurgy so that the student can better understand the problems of metal control that arise in the production of ferrous castings. And a better understanding should result in improved quality and more efficient operations. The text contains 520 frames, 86 illustrations on 111 pages.

**Circle No. TE 690 on order blank**

**Price \$6.95**

*Principles of Production Metallurgy for Ferrous Castings*, Vol. 2, is also authored by Clyde B. Jenni. This course can be used as a refresher course for experienced foundrymen or as a self-learning and teaching course for beginners. The production of iron from iron ores and the practices used in the manufacture of cast irons and cast steel are studied in 678 frames found on 112 pages. The knowledge gained by an understanding of the principles involved in the melting and refining of cast irons and cast steels will be invaluable for the production of quality castings having the required engineering properties.

**Circle No. TE 700 on order blank**

**Price \$6.95**

*Introduction to the Cast Metals Industry* is just as its title implies, an introduction to all aspects of the industry; pattern making, coremaking, molding, melting, cleaning and inspection. In this course, the student will study terminology, tools and methods used to produce castings. It is the intent of this course to give the student a better understanding of what goes on in a foundry. This text is made up of 111 pages, 395 frames with 53 illustrations.

**Price \$7.00**

## NOW AVAILABLE: METALCASTER'S REFERENCE AND GUIDE

Destined to be one of the most-talked about, most-used reference sources in the metalcasting industry, American Foundrymen's Society "METALCASTER'S REFERENCE AND GUIDE" is the first, comprehensive, "encyclopedia of metalcasting reference information" ever published—covering all facets of metalcasting! Here it is . . . a virtual library of technical information . . . in one volume . . . indexed, up-to-date information that every metalcaster can use daily.

Metalcasters who have been accustomed to spending long hours in search of information vital to a particular gating system, a more refractory material or data which could contribute to improved production or casting quality *need search no more*. "METALCASTER'S REFERENCE AND GUIDE" now gives you all the data you ever wanted to know about metalcasting but couldn't find.

Take an average metalcasting executive making \$15 an hour. He wants to know a particular bit of information (i.e., composition of various brasses by color). His average search, using a technical library, will take at least 20 minutes. This means he has spent \$5 of his company's money to find out what he needs to know. A few searches and he *will have paid* for his own copy of this invaluable Guide.

How much is it costing *you* to locate a certain piece of information? Now, with the "METALCASTER'S REFERENCE AND GUIDE," you save time and money . . . and have all the pertinent information you need right at your fingertips!

Years in the making, "METALCASTER'S REFERENCE AND GUIDE" has

been compiled and edited by Ezra Kotzin, Technical Director of the American Foundrymen's Society . . . working with research institutes, associations, technical publishers and manufacturers . . . making this the *complete reference guide* that all metalcasters (engineers . . . foremen . . . cupolamen . . . pourers . . . designers . . . buyers . . . salesmen . . . suppliers . . . vendors . . . actually anyone who wants fast facts about foundry fundamentals) have always needed.

Some metalcasters are lucky! Especially when the "Ifs" are on your side . . . with the "METALCASTER'S REFERENCE AND GUIDE" . . .

IF on Monday your foreman discovers why steel cannot be cast in plaster of paris . . .

IF on Tuesday you locate the correct address of the Society of Aerospace Material and Process Engineers . . .

IF on Wednesday your cleaning and finishing foreman looks up the comparative hardness of abrasives . . .

IF on Thursday you need to know the SFSA specifications for western bentonite . . .

IF on Friday your air pollution expert needs to know the efficiency of collection of foundry emissions . . .

And IF on each day, all year long, every one of your information searches could be answered by looking in your "METALCASTER'S REFERENCE AND GUIDE" you would feel that you were a pretty lucky metalcaster — and a smart one at that. Be sure to make yourself lucky by using this "work-a-day" Guide every day. You'll find it loaded with wonderfully convenient information concerning . . .

- . . . geometric formulas for calculating casting weights.
- . . . oxygen flow in lances.
- . . . electric conductivity of elements used in alloys.
- . . . castability of investment casting alloys.
- . . . air requirements for combustion.
- . . . a complete conversion table, English, Metric, SI and American units.
- . . . temperature scales comparison.
- . . . incandescent color temperature chart—how to estimate temperature of any substance from its color.
- . . . intensity of typical noise sources.
- . . . range of hardness available in gray and white irons.
- . . . nominal composition of often-referred to trade name alloys.
- . . . pyrometric cone equivalents for various refractory bricks.

. . . relative properties of cast ferrous alloys.

. . . making a plaster mold.

. . . practical ways to calculate ladle capacities.

. . . densities of metals in molten state.

. . . minerals in foundry sands, clays and refractories.

. . . plus a complete list with addresses of foundry-related organizations.

First edition; 6 x 9 inch size; 550 pages; fully indexed; over 200 illustrations and charts; over 500 items of specific information.

## CASTING DEFECTS HANDBOOK

The Casting Defects Committee of the AFS Molding Methods and Materials Group IV has realized the completion of a long-time project. The efforts of this committee are realized in the Casting Defects Handbook.

The 1971 edition of the Casting Defects Handbook is unique in many ways. Most technical publications are usually directed to the metallurgical laboratories, or company technical libraries, but the Casting Defects Handbook from its original planning has been designed primarily for the supervisory staff as an immediate and available "in-plant" reference. Specifically designed to "fit the pocket." It is profusely illustrated with typical examples rather than the one-of-a-kind casting defect occurrences.

AFS Research, aided by the new tools of technology has given us greater insight into some of the actual origin of casting conditions which prevent the casting from being shipped to the customer. The Casting Defects Handbook will prove to be a most important and invaluable aid for chief inspectors, quality control teams, manufacturing and process engineering departments, as well as a text for in-plant training.
